

**EcoTek<sup>®</sup>**

**NITRILE GLOVES WITH  
SUSTAINABLE TECHNOLOGY**

What is...

# EcoTek®

EcoTek is SW's patented, environmentally sustainable glove formula. EcoTek is manufactured sustainably and rigorously tested per the ASTM D5526 standard\*. EcoTek is useful for all glove users and industries as it reduces emissions when incinerated.

Our formula has been proven to produce 53% less NO<sub>2</sub> (Nitrogen dioxide) emissions, 82% less SO<sub>2</sub> (Sulphur dioxide) emissions, 77% less TVOC (Total Volatile Organic Carbon) emissions, and 82% less CO (Carbon monoxide) emissions, and 13% less CO<sub>2</sub> (Carbon dioxide) emissions during incineration compared to regular nitrile gloves. Results are based on third-party testing comparing emissions to a standard nitrile glove, incinerated in a dual-chamber incinerator. The reported CO<sub>2</sub> emissions represent the combined emissions from both the glove material and the fuel combusted during the incineration process.

\*EcoTek gloves tested to ASTM D5526-12 Standard Test Method for Determining Anaerobic Biodegradation of Plastic Materials Under Accelerated Landfill Conditions. Results are 92.6% biodegradation in 60% solids landfill at 945 days. Future results cannot be predicted/ extrapolated. If you need more information on the test reports, send email to [cs@swssglobal.com](mailto:cs@swssglobal.com).
