

EcoTek®

**NITRILE GLOVES WITH
SUSTAINABLE TECHNOLOGY**

What is...

EcoTek®

EcoTek is SW's patented, environmentally sustainable glove formula. EcoTek is manufactured sustainably and tested by an independent laboratory*. EcoTek is useful for all glove users and industries as it reduces emissions when incinerated.

Our formula has been proven to produce 53% less NO₂ (Nitrogen dioxide) emissions, 82% less SO₂ (Sulphur dioxide) emissions, 77% less TVOC (Total Volatile Organic Carbon) emissions, and 82% less CO (Carbon monoxide) emissions, and 13% less CO₂ (Carbon dioxide) emissions during incineration compared to regular nitrile gloves. Results are based on third-party testing comparing emissions to a standard nitrile glove, incinerated in a dual-chamber incinerator. The reported CO₂ emissions represent the combined emissions from both the glove material and the fuel combusted during the incineration process.

*EcoTek gloves are tested in an independent laboratory for their Anaerobic Biodegradation potential Under Accelerated Landfill Conditions. Results show 92.6% biodegradation in 60% solids landfill at 945 days. Future results cannot be predicted/extrapolated. If you need more information on the testing, contact cs@swssglobal.com.
