BreachAlert®

Visual Detection Technology

Safety You Can See

What is BreachAlert?

BreachAlert technology features dual-color, 2-ply construction that provides immediate visual breach detection for safer glove usage. If the outer layer is compromised, the contrasting inner layer quickly alerts the user to the breach, enhancing safety in critical environments.

The Danger of Ripped Gloves

Don't Let a Small Tear Become a Big Problem. A compromised glove can lead to exposure to harmful substances, endangering both the user and their environment.

Why Choose BreachAlert?

- **Enhanced Safety:** Instantly visible breaches reduce risk during high-stakes tasks.
- **Superior Durability:** Two distinct polymer layers add extra strength for reliable performance.
- **Improved Protection:** Dual-color technology ensures rapid identification of glove integrity issues.
