Recycle Responsibly: Polycarbin + SW EcoTek Gloves

TURN GLOVE WASTE INTO SOMETHING GREATER

We're proud to partner with Polycarbin to offer an innovative glove recycling solution that helps labs reduce glove waste while advancing sustainability goals. Now, your EcoTek® nitrile gloves can do even more—protect hands and the planet.

HOW IT WORKS

The process is simple and designed to integrate easily into your lab workflow:

- Collect your used SW gloves made with EcoTek® sustainable nitrile technology.
- Dispose of them in Polycarbin's glove recycling bins.
- Polycarbin processes the gloves into new feedstock for building and automotive products—supporting a circular economy.
- Track your impact with Polycarbin's Carbin Counter™, a data platform that measures glove diversion, carbon savings, and more—verified by third-party life cycle assessments.

THE NEXT STEP IN LAB SUSTAINABILITY

By combining the power of EcoTek® biodegradable gloves with Polycarbin's advanced recycling system, your lab can reduce waste, improve sustainability metrics, and contribute to a cleaner future. This partnership helps support a circular economy—where used materials are repurposed into valuable new products, keeping resources in use longer without changing the way you work.
